

SPRING 2022

Semester by the Sea

at the Marine Science Institute in Port Aransas, Texas

Spend a semester on the coast and dive into cutting-edge research with this comprehensive spring program for UT undergraduates.

The spring Semester by the Sea program offers five 3-credit hour organized courses plus a four-credit field research course for an independent field- or lab-based research project. Courses count towards degree requirements for EVS, EEB, & MS.

MNS 353 Marine Policy (Dr. Dickey)

MNS 354E* Aquatic Microbiology (Dr. Baker)

MNS 353 Marine Community Ecology (Dr. Brandl)

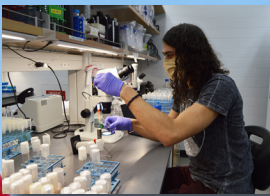

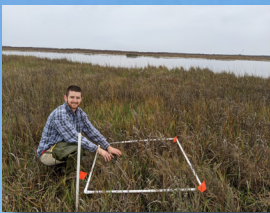

MNS 355C Physiology of Fishes (Dr. Esbaugh)

MNS 354Q* Marine Environmental Science (Dr. Nielsen)

MNS 152R** Marine Science Research and Reporting (Dr. Biggs). (Registrants also need to register for MNS 370 Special Studies in Marine Science)

* Includes two field trips at Port Aransas

** Lab/Field component are offered in Port Aransas only (not video-linked)

Students accepted into the program are eligible for:

- Campus housing with week-day cafeteria services.
- Top students are eligible for a travel award to a national or regional science meeting based on their research.
- Access to marine instrumentation and diverse small boat fleet at UTMSI for field research.
